

SEAT ALUSEAT

The ALUSEAT model is a tip-up seat entirely made of die-cast aluminum, ensuring reliability and durability throughout its life cycle. It is suitable for all types of outdoor and indoor environments. The tipping system operates by gravity, and the coloring is done through polyester powder coating, according to the customer's specifications.

The seat is equipped with a slot for a numbered seat tag and row marker. It is also available in a padded version, with fire-resistant polyurethane cushions covered in fire-resistant fabric or eco-leather. Armrests can be installed upon request.

The ALUSEAT model complies with FIFA/UEFA regulations and adheres to European standards EN 13200-1-4. The seat is tested according to the EN 12727:2017 standard (level 4 – severe).

The dimensions and/or the type of supporting elements can vary to adapt to low or high step risers, or for installation on adjacent support beams. ALUSEAT is available in two sizes: "PUBLIC" and "MAXI".
