

Seat MARSIGLIA

The MARSIGLIA model is a one-piece seat featuring transverse and longitudinal reinforcement ribs that ensure strength and quality. The backrest, with a closed double-wall box structure, offers maximum resistance to vandalism. Its ergonomic design provides high spectator comfort and automatic liquid drainage without the need for holes, thus preventing dirt accumulation.

Certified to the highest market standards, the MARSIGLIA seat complies with FIFA/UEFA recommendations and Minimum Environmental Criteria (CAM), in accordance with European Standards EN 13200-1-4. It has been laboratory-tested to meet EN 12727:2017 (level 4 – severe).

Made from top-quality injection-molded polypropylene copolymer, it is also available in a green version using recycled polypropylene (PSV), certified by IPPR, or in polyamide. The seat is fire-retardant in compliance with current regulations and UV-resistant thanks to specific additives.

It is equipped with a visible, tamper-proof numbered tag, customizable upon request. The seat's smooth surface allows for easy cleaning. Installation is done using 2 or 4 anchoring points, protected by non-removable caps in the same color as the seat.
